Supplemental Data

Non-GAAP Financial Measures Disclosure

To supplement our financial information, which is prepared and presented in accordance with generally accepted accounting principles in the United States of America, or GAAP, we use the following non-GAAP financial measures: Adjusted EBITDA; Non-GAAP Costs and Operating Expenses; Delivery business model change impact on Revenue; Mobility business model change impact on Revenue; Delivery business model change impact on Cost of Revenue; Mobility business model change impact on Cost of Revenue; Free Cash Flow; as well as revenue growth rates in constant currency. The presentation of this financial information is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. We use these non-GAAP financial measures for financial and operational decision-making and as a means to evaluate period-to-period comparisons.

We believe that these non-GAAP financial measures provide meaningful supplemental information regarding our performance by excluding certain items that may not be indicative of our recurring core business operating results.

We believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting, and analyzing future periods. These non-GAAP financial measures also facilitate management's internal comparisons to our historical performance. We believe these non-GAAP financial measures are useful to investors both because (1) they allow for greater transparency with respect to key metrics used by management in its financial and operational decision-making and (2) they are used by our institutional investors and the analyst community to help them analyze the health of our business.

There are a number of limitations related to the use of non-GAAP financial measures. In light of these limitations we provide specific information regarding the GAAP amounts excluded from these non-GAAP financial measures and evaluating these non-GAAP financial measures together with their relevant financial measures in accordance with GAAP.

For more information on these non-GAAP financial measures, please see the section titled "Non-GAAP Reconciliations" included at the end of this deck.

In regards to forward looking non-GAAP guidance provided on our Q1 2024 earnings release and call, we are not able to reconcile the forward-looking non-GAAP Adjusted EBITDA measure to the closest corresponding GAAP measure without unreasonable efforts because we are unable to predict the ultimate outcome of certain significant items. These items include, but are not limited to, significant legal settlements, unrealized gains and losses on equity investments, tax and regulatory reserve changes, restructuring costs and acquisition and financing related impacts.

Forward Looking Statements

This presentation contains forward-looking statements regarding our future business expectations, which involve risks and uncertainties. Actual results may differ materially from the results predicted, and reported results should not be considered as an indication of future performance. Forward-looking statements include all statements that are not historical facts and can be identified by terms such as “anticipate,” “believe,” “contemplate,” “continue,” “could,” “estimate,” “expect,” “hope,” “intend,” “may,” “might,” “objective,” “ongoing,” “plan,” “potential,” “predict,” “project,” “should,” “target,” “will,” or “would” or similar expressions and the negatives of those terms. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. These risks, uncertainties and other factors relate to, among others: competition, managing our growth and corporate culture, financial performance, investments in new products or offerings, our ability to attract drivers, consumers and other partners to our platform, our brand and reputation, other legal and regulatory developments, particularly with respect to our

relationships with drivers and couriers, and the impact of the global economy, including rising inflation and interest rates. In addition, other potential risks and uncertainties that could cause actual results to differ from the results predicted include, among others, those risks and uncertainties included under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our annual report on Form 10-K for the year ended December 31, 2023 and subsequent annual reports, quarterly reports and other filings filed with the Securities and Exchange Commission from time to time. All information provided in this presentation is as of the date hereof and any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of such date. We undertake no duty to update this information unless required by law.

Business model changes since Q1’20 have triggered changes in classification of certain costs, including payments to drivers or couriers and promotions to platform users or earners.

The Business Model Change Impact line item presented on this page represents the net benefit to revenue for each of the periods presented as a result of the changes.

The net benefits are primarily driven by the classification of certain payments and incentives as cost of revenue, partially offset by the classification of certain sales and marketing costs as contra revenue.

In aggregate, the changes have no real economic change to operating income or Adjusted EBITDA.

Note 1: The first business model change began in Q1’20 in certain markets and expanded to additional markets over time. The changes resulted in us being the principal of providing delivery services where certain courier payments and incentives are classified as cost of revenue and end-user promotions are recorded in contra revenue. The second business model change began in Q1’22 which impacted our Mobility business in the UK. The model change resulted in us being the principal for providing transportation services where certain driver payments and incentives are classified as cost of revenue and end-user promotions are recorded in contra revenue. The third business model change began in Q2’23 in certain markets and expanded to additional markets. The changes resulted in end-users becoming our customers whereby incentive costs for customers are recorded in contra revenue instead of sales and marketing expense.

Business Model Change Impact on Cost of Revenue

\$ in Millions

	Three Months Ended				
	Mar 31, '23	Jun 30, '23	Sep 30, '23	Dec 31, '23	Mar 31, '24
